

Little Swan Lake Sanitary District

When we have water loss due to a leak in the system we send out an announcement asking all owner to look around their property for a potential leak. If you are not a fulltime resident or are away from your home for a period-of-time, we ask you make arrangements with someone to look for potential leaks on your property. Please make sure you know where your shut off valve is located, as well as the location of your service line. This will assist everyone in looking for a leak and turning off the water in the event of a line break. If you have any questions please call Patrick McKinley at 309-696-4624.

If you are interested, we have a direct pay option for your monthly water bill. If you would like to take advantage of this automatic payment please contact Christie Butler at 309-333-4948.

In October 2020 we will send out the notice for the last payment on the water tower assessment. The final payment will be \$90.24.
